In 1924, his Douglas World Cruisers were the first aircraft to circumnavigate the globe, and, in 1933, he introduced his famed DC series of passenger planes that again revolutionized air travel. The monument onsite is comprised of a restored DC-3 and a lifesize statue of Douglas by resident sculptor Yossi Govrin.

art mentor program

The Art Mentor Program is a unique learning experience for a select group of students from the SMC Art Department. Students are challenged to explore their creative work and that of others, and to solve problems in innovative ways. Students create portfolios, study preparatory practice and are introduced to the dynamics of galleries, museums, curators and collectors. The program encourages students to become more competitive by stimulating the intellectual awareness required to present themselves as professionals in local and international visual art communities. The Art Mentor Program is led by SMC Art Department Chair Ronn Davis and is taught by Carlson Hatton.
